## Investment Objective and Investment Policy

The investment objective of the fund is to generate value from a worldwide, diversified portfolio of equity.

The investment strategy is based on a value-style fundamental review of company performance. Risk diversification and liquidity are always fully considered.

## Characteristics

The fund is suitable for long-term oriented investors, who prefer to invest in a globally diversified equity portfolio and would like to delegate the tactical asset allocation to the fund manager.

## Investment Manager's Comment

The fund continued to perform well in April. We are currently finding the most value in quality stocks. With the spare parts dealer Autozone and the health insurer Humana, we bought two such stocks with an excellent long-term track record. Away from the expensive technology stocks, on which investor interest remains focused, there are quite a few such fairly attractive quality stocks to be found in the U.S. market. We sold Mettler-Toledo on the other side as it had reached our estimated fair value.
