### **Risk Warning**

Users of this website are requested to inform themselves about risks in securities trading. We highly recommend to follow closely the brochure of the Swiss Bankers Associations “Special Risks in Securities Trading”.

The value of the invested capital and its returns and dividends are subject to fluctuati-

ons and can even be lost completely. A positive historical track record is therefore no guarantee of future returns. In particular, preservation of capital cannot be guaranteed. There is no certainty that the invested capital or the value of its shares in the case of a sale or redemption will be equivalent to the initially invested capital. Investments in foreign currencies are furthermore subject to exchange rate risks. Returns are therefore influenced by the volatility of foreign currencies, which can have a negative effect on the performance of the invested capital. Members of Quantex AG cannot be held responsible for any losses.

You should not execute security trading business in any case without exactly knowing the associated risks and to have made yourselves a view on your financial mobility of the substantial exposures to loss. We recommend not to trade without professional consultation.
