52 Week Low	CHF	128.07
Total Assets in mn	CHF	683.73 (all classes of the fund)
Number of Shares		712'959

Investment Objective and Investment Policy

The objective of the fund is to achieve a reasonable and inflation-resistant return over the medium to long term through a broadly diversified portfolio of equities, commodities, bonds and money market instruments. To reduce risk, large individual bets are avoided and the portfolio is regularly rebalanced.

Characteristics

The fund is suitable for investors with a medium risk tolerance who are looking for long-term participation in the equity and commodity markets as well as inflation protection through real assets.

Investment Manager's Comment

The main driver of the fund's performance in January was the sharp rise in gold and silver prices. In line with our strategy, we were continuously selling into market strength for rebalancing purposes and decided before the end of the month to make an additional countercyclical reduction in the gold allocation from 10% to 9%. Speculation in precious metals had become too intense, and we saw better investment opportunities in other commodities and equities. The extreme polarization in the equity markets intensified again in January, and we bought fundamentally stable stocks with poor price momentum across a broad spectrum: software stocks such as GoDaddy and Reply, the database publisher Wolters Kluwer, the online platform Swiss Marketplace, and the gambling group Betsson. We sold our positions in Endeavour Mining and Philip Morris, which had reached or were very close to their fair value.
