52 Week Low	USD	90.97
Total Assets in mn	USD	144.92 (all classes of the fund)
Number of Shares		264'106

Investment Objective and Investment Policy

The Investment fund invests in gold and silver, as well as in companies involved in drilling, mining and marketing in the precious metals industry.

Characteristics

Due to its balanced structure, the fund offers a combination of stability and growth potential in a world of increasing tensions, economically and politically. It is therefore the suitable investment vehicle for long-term investors.

Investment Manager's Comment

The gold rally continued in April. Interestingly, it is mainly physical purchases from Asia that are driving the price of the precious metal. Both central banks and private investors in the Middle and Far East are buying precious metals to protect themselves against currency devaluation and fiscal deficits. Surprisingly, Western investors have been among the sellers in gold ETFs such as the American GLD since the beginning of the year. Particularly noteworthy: In Japan, the price of a gold ETF traded above its NAV for several days after the Bank of Japan made no move to raise interest rates despite the weakness of the yen. If the ECB or the US Fed decide to cut interest rates soon, even though inflation remains elevated, we can expect even higher gold prices. On the equity side, we have added two solid producers with Agnico-Eagle Mines and Perseus Mining, which are benefiting directly from the higher gold prices and are also passing on a good portion of this to shareholders.

Net Asset Value in USD

Market data (Quantex, Bloomberg) of April 30, 2024

Net Performance in USD (fund after fees, index without fees)

	Apr 24	YTD	1 Year	5 Years	10 Years	Incept.*
